Re: Plugging Forms and Logs
Murray Hill Oil & Gas Co.
Stoner Unit #1
Quay County, NM

Dear Mr. Johnson:

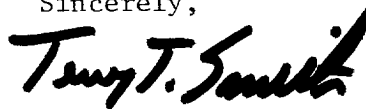

Enclosed are copies of our logs and plugging reports on our Stoner Unit #1 Dry Hole.

We attempted a drill stem test in the Granite Wash section, but the tools and drill pipe became stuck while attempting to test.

We request that you keep the logs on this well confidential for 90 days. We are planning other exploratory operations in this area and release of the logs at this time would jeopardize our program.

Thank you.

Sincerely,

A handwritten signature in black ink, reading "Terry T. Smith". The signature is written in a cursive, flowing style with a large initial "T".

Terry T. Smith
