

Proposed Development Plan for Surface Use

1. Existing roads including location of exit from main highway. Existing roads shall be maintained in the same or better condition.

Detailed map showing drillsite location in relation to the nearest town and all existing roads within one mile of the wellsite are shown on Exhibit A.

2. Planned access roads. From Nara Visa, New Mexico go 8 miles north on State Highway 18, turn west on county road for 6 miles, turn south on county road for 2.2 miles, turn west on lease road for $\frac{1}{4}$ mile to location. Approximately 2.40 acres of access road to be built

3. Location of existing wells.

~~All existing wells within one mile radius are shown on Exhibit B.~~

No existing wells within one mile radius

4. Location of tank batteries and flow lines.

If the well is commercially productive, the production facilities (i.e. tanks, separators, & treaters) will be ~~located on the pad and a schematic is shown on Exhibit C.~~ a gas flow line to our compressor facility located in Sec.26, T-19-N, R-34-E, Union County, New Mexico

5. Location and type of water supply.

Fresh & brine water to be hauled by commercial hauler.

6. Source of construction materials.

Road and location to be caliched only if productive well. If caliched, pit located in the SE/4, Sec.21, T-17-N, R-35-E, Quay County, New Mexico will be used.

7. WASTE DISPOSAL -

- a. Drill cuttings will be disposed of in the reserve pit.
- b. Drilling fluids will be allowed to evaporate in the reserve pit until the pit is dry.
