INSPECTION REPORT  
December 12, 1952

BESS OIL & GAS CO.

Re: Bess-Rock Bros. #1  
NESE Sec. 10-16N-35E  
Quay County

This well is still shut down as reported in my report of November 14. However, the operator has entered into an agreement with Messrs. A. J. Harlow & O. E. Combs, who will complete the well. Plans are to underream the 5 $\frac{1}{2}$ " casing, now seated at 2815', and lower same to get a water shut off.

During the past week the casing was raised and an attempt made to bridge the hole with clay, coal & beargrass.

The operator now is trying to locate some more 5 $\frac{1}{2}$ " casing and will start underreaming shortly. He intends to lower the pipe gradually and bail periodically to check for water shut off.
