

INSPECTION REPORT

July 18, 1952

Newton R. Roberts

Re: McCune No. 1
NWSE Sec. 22-11N-13E
San Miguel County

This well has reached a total depth of 3119' at 9:00 a.m. today. Drilling is progressing slowly with RM3 rock bits which average 15 to 23 feet per bit. The formation at present may be classified questionably as a granite wash with numerous stringers of red, green and black shale.

Circulation trouble during the week has been negligible; about two inches of pit mud was lost to the hole but circulation was re-established with cotton seed hulls.

E.A.C.

EUGENE A. CHAVEZ,
Geological Scout - District 4
