Palm Beach, Florida

Dear Sir:

This will acknowledge receipt of your card dated April 11, 1953, wherein you inquire about activity in SW San Miguel County,

Please be advised that two expository wells were drilled in this area during 1952 by Newton R. Roberts of Denver, Colorado. The first well, McCune No. 1 on NWNE, Sec. 22, 11N-13E, was spudded on June 15, 1952, and was plugged and abandoned on July 22, 1952, as a dry hole with a total depth of 3113'. The second well, Roberts #1 Aaron on SWSW, Sec. 14-11N-15E, was spudded on July 29, 1952 and partially plugged for conversion to a water well on October 3, 1952. This well was drilled to a total depth of 4395' and plugged back to 3425'.

To my knowledge there has been no further drilling activity in this vicinity since last fall to the present time.

Very truly yours,

E. A. CHAVEZ,
Geologist-Dist. 4
