Well No. Fed. #1 is located 2096 ft. from [N] line and 444 ft. from [E] line of sec. \_\_\_\_\_SW $\frac{1}{4}$  of NW $\frac{1}{4}$  of Sec. 8 T14N. Range 12 East N. M. P. M.  
( $\frac{1}{4}$  Sec. and Sec. No.) (Twp.) (Range) (Meridian)Glorieta Mesa San Miguel New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Well has now reached a depth of 1501 feet and it is the desire of the Directors of the company to temporarily abandon with intention of deepening said well upon obtaining a heavier rig capable of going through the Pennsylvania formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
