Dear Mr. Elliott:

It was a pleasure to meet you and your associate, Earnest Bowen last week. I feel sure that we will have a fine relationship on this mining venture, and the oil program as well.

As I stated on the phone we are very anxious to proceed with the uranium mine. We have been promised the funds necessary to develop the mine which is one huge hurdle. On the way home, I verified the fact that the chemist I had in mind could do the work on the uranium and was pleased that he has been on several projects that we have in mind.

On the Oil Report that you gave me, the pages after No. 6 is missing, could you please reproduce them and send me the copies? I believe there are eight (8) pages in all.

I expect to call you on Saturday night and make further arrangements for one or both of the projects. The whole program is shaping up nicely.

Sincerely,

Arthur N. Owley

Dear Mr. Elliott:

We are very interested in your Oil Deposit and your hole drilled in the Northeast corner of Sec. 32, T. 11 N. - R. 7 E., New Mexico that has been drilled to a completed depth of 1930 feet.

We have made arrangements with a company to furnish us the necessary money and machines to drill this hole down to the depth of 3200 feet. Unfortunately with the Christmas Season now at hand, and it may be difficult to get down there before the first of the year. However, we have been assured that they will finance us to check the hole to completion.

We now plan to be down there immediately after the first of the year at which time we will complete other programs at the same time. In the meantime, we are gathering the equipment that we will need.

Cordially,

Arthur N. Owley
