Re: 32-11N-7E

Horton well #1

Memo

From

CARL ULVOG

SENIOR

PETROLEUM GEOLOGIST

To

Bill:

I talked to landowner about operation started and abandoned by Sage Corp. (now defunct) and taken over by Paddilla & Ludwick in May this year. No action yet and C-101 (permit to drill) expired.

Horton wants well for water if no oil or gas is developed, but is in no particular rush to take over — if there is a possibility of well being drilled deeper.

So, do not set for hearing yet.
I will jump on new operators and try to get them off dead center. If that fails, we will have forced plugging
