Copy of last report to O.C.C. We need follow-up.

We propose to set 1 joint of 7" surface casing. We will drill a 5-inch hole to approx.

900 feet to test the Dakota Formation. If no shows are encountered, the test will be

plugged and abandoned. If productive possibilities are indicated, we will ream the 5-inch

hole to 6-1/4" and run 4-1/2" - 10.50# casing to through indicated pay zone. We will not

use a BOP as per our letter of April 16, 1979.
