New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 5691 ft. ground level

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Will set 300 feet of 10" casing, or more, and cement from top to bottom, using Halliburton Cementing Co. Will drill well with rotary rig to a depth of 4,000 feet or granite or production, starting soon.
