INSPECTION REPORT

April 3, 1952

RE: Richard B. Laing
#1 Sanchez
NWSW Sec. 23-2N-4E
Socorro County

On this day I talked with Mr. R. B. Laing, who gave me the following information on his Sanchez #1 well. Final depth reached is 1182'. The well has been plugged back to 870' with a 10' cement plug above a home-made bridging plug. It is being temporarily abandoned while a step-out (approximately 1500') test is made to about 2000' TD. Consequently tentative plans are to deepen the first well after the step-out well is drilled, if conditions warrant.

E.A.C.

EUGENE A. CHAVEZ,
Geologist
