Re: H.B. Colbaugh #1
SWSW Sec. 12-1N-12E
Torrance County

The above captioned well was abandoned on August 15, at a total depth 1126'. All casing that was run has been pulled. It has been turned over to the landowner, Mr. Colbaugh, who intends to convert same to a water well.

The latter has submitted to the Oil Conservation Commission an affidavit assuming full responsibility to the state and relieving the Lubbock Machine & Supply Company of any plugging commitments.

A complete set of samples have been given to me by Mr. W. G. Weatherford, the operator. These samples will be delivered to the School of Mines at Socorro.
