P. O. BOX 871

SANTA FE, NEW MEXICO

INSPECTION REPORT

July 24, 1952

LUBBOCK MACHINE Co., Inc.

Re: H.B. Colbaugh #1
SWSW Sec. 12-1N-12E
Torrance County'

The above captioned well has today reached a total depth of 1081' and the hole at 5:00 p.m., was being straightened. (Actually, a total depth of 1086' was reached but a boulder deflected the hole at approximately 1078'.) The crooked interval was back filled with local surface rock and pieces of drilling cable in an effort to penetrate the obstruction vertically.

The formation at present continues to be a pink to light brown granite wash. Drilling has progressed uninterrupted throughout the week and water in the hole now stands approximately 600' deep, its having found its natural level.
