INSPECTION REPORT

July 24, 1952

SWEETMAN & ADAY
DRILLING ASSOCIATES

Re: Cecil D'Spain No. 1
NENW Sec. 12-6N-6E
Torrance County

The above captioned well has reached a total depth of 445' at 3:30 p. m. today. The formation now is a light gray to buff limestone and has been of this same nature all this week with the exception of several soft red clay-stone stringers within 413-435' which included a 6" section of granite wash. A 6" streak of soft gray shale was penetrated at 443'.

Drilling has proceeded steadily all week and the average daily footage has been 6 to 7'.

E. A. C.

EUGENE A. CHAVEZ,
Geologist - District 4
