INSPECTION REPORT

June 11, 1952

SWEETMAN & ADAY  
DRILLING ASSOCIATES

RE: Cecil D'Spain #1  
NENW Sec. 12-6N-6E  
Torrance County

I visited the above well on this day and found that work has been suspended since June 2. Mr. D'Spain, the landowner, revealed that the operators have shut down while trying to lease some adjoining property. Mr. Sweetman expressed hopes of resuming operations on the 13th or 14th of this week.

Present total depth is 188' and formation encountered here is a black to dark gray carbonaceous limestone which is grading to a sandy limestone.

E. A. CHAVEZ,  
Geologist - District 4
