INSPECTION REPORT

June 18, 1952

SWEETMAN & ADAY
DRILLING ASSOCIATES

Re: Cecil D'Spain No. 1
NENW Sec. 12-6N-6E
Torrance County

Drilling at the above captioned well was resumed on the morning of June 16. Total depth reached by quitting time today was 230' and this was in a coarse grained, vari-colored sandstone. Progress today amounted to approximately 20' of new hole.

A sample of cuttings recovered at the above total depth was collected and will be sent to the Bureau of Mines for qualitative analysis.

E. A. C.

EUGENE A. CHAVEZ,
Geological Scout - District 4
