

OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

INSPECTION REPORT

November 14, 1952

SWEETMAN & ADAY
DRILLING ASSOC.

Re: Cecil D'Spain #1
NENW Sec. 12-6N-6E
Torrance County

The above captioned well has a total depth of 815' as reported in the report of September 26, 1952. The operators have had considerable difficulty in getting surface casing, however they are presently maneuvering for a string of approximately 135' of 14" which they expect to acquire and run in the hole shortly. Once they get some surface casing set they will feel safer in carrying the hole on down.

EUGENE A. CHAVEZ,
Geologist - Dist. # 4
