Colorado, Oil & Gas Well Drlg.,
Eff. Date 12-27-55

Gentlemen:

On April 1, 1958, this office sent to Mr. Troy R. Pollard at P.O. Box 542, Blanding, Utah, the forms necessary for the proper plugging of the well or wells covered by the subject bond. These forms must be completed and the well or wells inspected before the bond may be released. At this time we have received no reply from Mr. Pollard, thus the subject bond cannot be cancelled.

Very truly yours,

Richard L. Stamets
Geologist

Re: Pollard Brothers Unit
H. J. Sewell, et al El, H,
Section 28, and Moore and Mead
M, Section 30, Township 8 North,
Range 8 East, Torrance County,
New Mexico

Dear Mr. Pollard:

In reply to your letter requesting forms and information leading to the cancellation of the drilling bond covering the subject wells, we are sending you with this letter, several copies of the appropriate forms with a sheet of pertinent instructions.

We have checked our files on these wells and found that only the C-101 and the C-128 have been filed on the Sewell Well and that a C-101, C-128 and a change of ownership have been filed on the Moore and Mead well. It will be necessary for you to file a form, for each well reporting the date drilling was actually commenced and the results of casing shut off tests for each string of casing run, and a C-103 giving the status of the Moore and Mead well at the time it was transferred to Anderson and Woodson Exploration Company. The Form C-102 outlining a satisfactory plugging program, must be filed even if this well has already been plugged and further, a complete record of the actual plugging operation must be reported on Form C-103.

After this office receives these forms and an inspection is made of the site, we may release your bond provided that the well, Sewell #1, has been properly plugged.

Very truly yours,

RICHARD L. STAMETS
Geologist
