17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

July 20, 1981 The Western Company of North America plugged the well by using 20 sacks of cement. Enclosed you will find the copy of the field work sheet. We had to do it this way because we had lost circulation three times and we were getting our drill pipe stuck. We never contacted any producing zones or water zones (salt water). Our Geologist was running samples which proved no hydrocarbons. Our main interest was the Glorietta - we never reach this zone. Because of the fact that we were so shallow and not reach any hydrocarbons or salt water, we did as shown. Enclosed please find a drillers log, because the drill pipe was getting stuck, we could not risk the chance of running the tool down the hole.
