

CO₂ - In - Action #1, Amistad Land & Cattle Co.

E-18-19N-36E, Union Co.

June 9/1982

Last work on well was on May 22, 1981.

C-103 (rec'd 3/15/82) shows that.

Another C-103 (rec'd same date) is Notice of Intent to Temporarily Abandon. That was for feasibility study to determine if well would be converted for Salt Water disposal. No application for such conversion yet received.

Rule 202-B gives maximum TA permit time at 1 year - even with District Office Approval. (my approval on Notice of Intent 3/15/82 did not specify any time - that would be reserved for subsequent Notice C-103, showing workover for SWD permit. No application for SWD well yet.)

Letters have been written, phone calls made, requesting copies of well logs (Rule 1105) and plan for well conversion, plugging, or whatever, for past 9 months. No response yet.
