

DEVELOPMENT PLAN FOR ISLETA WELL NO. 1, VALENCIA CO., NEW MEXICO

1. Existing roads including location of the exit from the main highway.

The attached certified plat shows the exit from the State Highway No. 6.  
There are no existing roads in the vicinity of this well.

2. Planned access roads.

The planned access road is also shown in the attached plat.

3. Location of existing wells.

There are no existing wells within five miles of this location.

4. Lateral roads to well locations.

Not applicable.

5. Location of tank batteries and flow lines.

If this well is successful we plan to construct facilities on the well site location.

6. Location and type of water supply (rivers, creeks, lakes, ponds, wells, etc.)  
Water will be obtained from a water well to be drilled on location about 250' west of the proposed well site.

7. Methods of handling waste disposal.

Human waste will be handled by a chemical unit or a conventional outdoor privy. Garage, trash, etc. will be handled by sanitary landfill.

8. Location of camps.

No camps are required. The Shell Drilling Foreman will use a mobilehome as his office.

9. Location of airstrips.

No airstrips required.

10. Location of layout to include position of the rig, mud tanks, reserve pit, burn pits, pipe racks, etc.

A location layout plat and a rig layout plat show in detail the relative position of each of the above items.
