Van Nuys, California

Re: Sunol Oil #1  
Sec. 32-7N-1E

Dear Sir:

This is in answer to your letter of July 30, 1951, inquiring about the above captioned well.

This will advise you we have not received a C-101 - Notice of Intention to Drill and also a surveyors plat showing the location of the well as well as a request from Mr. D. L. Wade of Sunol Oil Company, San Jose California for an unorthodox location. The Notice of Intention to Drill as well as a surveyors plat will be ready and it is probable that we will allow the unorthodox location. However, it is essential that we have on file a \$5,000 one-well bond which we have not received and until this is received we will not be in a position to authorize operation of this well.

It is not necessary for the Commission to meet as a whole to approve application for permits to drill, if the information is complete enough when their Notice of Intention to Drill is filed. It can be approved from 24 to 48 hours.

Sincerely yours,

ELVIS A. UTZ,  
Gas Engineer
