APRIL 15, 2013

Mr. Glen Thompson
EPNG
1550 Windway
Odessa, TX 79763

Dear Mr. Thompson:

Based on your responses given in the "Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit" and a file review, the Oil Conservation Division (OCD) has determined that several of your facilities with an expired or soon to be expired permit do not require a Water Quality Control Commission (WQCC) Discharge Permit. This means that WQCC Discharge Permits **GW-151 (EPNG - Eunice B CS)**, **GW-379 (EPNG - Eunice C CS)**, and **GW-147 (EPNG - Deming CS)** are hereby terminated and you are not required to proceed with the renewal of these expired or soon to expire WQCC Discharge Permit. OCD will close these permits in its database.

Because these WQCC Discharge Permits are no longer valid, you may be required to obtain a separate permit(s) for other processes at your facility, such as: pits, ponds, impoundments, below-grade tanks; waste treatment, storage and disposal operations; and landfarms and landfills. OCD will make an inspection of your facility to determine if any of these existing processes may require a separate permit under OCD's Oil, Gas, and Geothermal regulations. If OCD determines that a separate permit(s) is required, then a letter will be sent to you indicating what type of permit is required.

Please keep in mind, if your facility has any discharges that would require a WQCC Discharge Permit now or in the future, then you will be required to renew or obtain a WQCC Discharge Permit. If you have any questions regarding this matter, please contact Glenn von Gonten at 505-476-3488.

Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit

Only Water Quality Control Commission- regulated systems will be incorporated into the OCD's WQCC Permits, while OCD regulated systems will be handled under separate permit(s). A current discharge permit is valid until its normal expiration date or November 15, 2012, whichever is later. All facilities with processes subject to the Water Quality Act must have permits in place by November 16, 2012. H2S Contingency Plans; pits, ponds, above and/or below-grade tanks; waste treatment, storage and disposal; and landfarms and landfills may require separate permitting under the OCD Oil, Gas, and Geothermal regulations.

*Proper completion and timely submission of this questionnaire is requested **for all facilities with discharge permit expiration dates before November 15, 2012.** Please complete and submit a separate questionnaire for each facility **before July 15, 2011.***

• Name of the owner or operator of the facility

El Paso Natural Gas Company

• Point of contact

Name Cesar Ochoa

Telephone (915) 587-3694

Email cesar_ochoa@kindermorgan.com

Mailing address 8645 Railroad Drive, El Paso, TX 79904

• Facility name Deming Compressor Station

• Facility location

Unit Letter, Section, Township, Range SWSE, Section 32, Township 23S, Range 11W

Street address (if any) Co Road D006, Luna County, NM

• Facility type

☐ Refinery

☐ Gas Plant

☒ Compressor

☐ Crude Oil Pump Station

☐ Injection Well

☐ Service Company

☐ Geothermal

☐ Abatement

☐ Other (describe) _____

• Current and Past Operations (please check all that apply)

☒ Impoundments

☐ Treatment Plant

☐ Waterflood

☐ Disposal Well

☐ Brine Well

☐ Wash Bay

Oil Conservation Division * 1220 South St. Francis Drive

* Santa Fe, New Mexico 87505

* Phone: (505) 476-3440 * Fax (505) 476-3462* <http://www.emnrd.state.nm.us>

☐ Steam Cleaning

☐ Groundwater Remediation

• **Facility Status** ☐ Active ☐ Idle ☒ Closed Abandonment approved by FERC

• **Does this facility currently have a discharge permit?** ☒ Yes ☐ No

If so, what is the permit number? GW-147

• **Are there any routine activities at the facility which intentionally result in materials other than potable water being released either onto the ground or directly into surface or ground water?**

(This includes process activities, equipment maintenance, or the cleanup of historic spills.)

☐ Yes ☒ No

If so, describe those activities including the materials involved, the frequency of discharge, and the estimated volume per discharge event.

None.

• **What is the depth below surface to shallowest ground water in the area?** 200 ft approx.

• **Are there any water supply, groundwater monitoring, or recovery wells at the facility?**

Water supply ☒ Monitoring ☐ Recovery ☐

If these wells are registered with the Office of the State Engineer (OSE), what are the OSE well numbers? (M-135-A & M-135-B-Comb.-S-3), (M-135-B)

• **Are abatement actions ongoing?** Pond and (3) below grade tanks will be removed

• **Are there any active or inactive UIC wells present as part of the federal Underground Injection Control program associated with this facility?** ☐ Yes ☒ No

If so, what are the API numbers assigned to those wells?

• **Are there any sumps at the facility?** ☐ Yes ☒ No

Number of sumps with volume less than 500 gallons _____

Use and contents _____

Is secondary containment incorporated into the design? ☐ Yes ☐ No

Number of sumps with volume greater than 500 gallons Eight 1,000 gallon tanks

Use and contents (7) BGT FRP jacket water tanks and (1) FRP oil water tank.

Is secondary containment incorporated into the design? ☒ Yes ☐ No

- Does the facility incorporate any underground lines other than electrical conduits, freshwater, natural gas for heating, or sanitary sewers? ☒ Yes ☐ No

If so, what do those buried lines contain?

Oil, Used Oil, Ethylene Glycol, Air, Cathodic Protection Cables, High Pressure Natural Gas Lines, Non-potable water scrubber blow down.

THIS FORM IS DUE TO THE OIL CONSERVATION DIVISION BY JULY 15, 2011.

Questions? Please contact Glenn VonGonten at 505-476-3488 or Carl Chavez at 505-476-3490.

Thank you for your cooperation.

December 7, 2012

Mr. Glen Thompson
3300 N.A. St Building 2
Ste 200
Midland TX 79705

Dear Mr. Thompson:

The Oil Conservation Division's (OCD) records indicate that the following Water Quality Control Commission (WQCC) Discharge Permit has already expired or will soon expire.

GW-379	Eunice C Compressor Station
GW-151	Eunice B Compressor Station
GW-147	Deming Compressor Station

OCD has revised its permitting policies. These changes may affect the renewal of your discharge permit(s). Please submit an "Oil & Gas Facilities Questionnaire for Determination of a WQCC Discharge Permit" for each of your facilities (see attachment and OCD's "Notifications and Announcements" at <http://www.emnrd.state.nm.us/oed>). Please submit the completed Questionnaires within 30 days of your receipt of this letter. Based on your response, OCD will determine whether you will need to submit a discharge permit renewal. If OCD determines that you no longer are required to operate under a WQCC Discharge Permit, you may be required to obtain a separate permit(s) for other processes at your facility, such as: pits, ponds, impoundments, below-grade tanks; waste treatment, storage and disposal operations; and landfarms and landfills. OCD will determine if any of these existing processes may require a separate permit under OCD's Oil, Gas, and Geothermal regulations. If OCD determines that a separate permit(s) is required, then a letter will be sent to you indicating what type of permit is required.

Please keep in mind, if your facility has any discharges that would require a WQCC Discharge Permit now or in the future, then you will be required to renew or obtain a WQCC Discharge Permit.
