On 1/30/2015 Frontier Field Services discovered a historic release ald	ong the Anderson Kanch Pipeline. From	itier estimated the release to exceed				
5bbl and prior notifications to/from NMOCD w/instructions, was give	en and followed.					
Excavation commenced to delineate and remove contaminated soils a	and to restore integrity of the nineline.					
Approximately 230 yd ³ have been excavated from the area surround	ing the pipeline. The excavated materia	al was transported to R-360 for				
disposal on 2/17/15 to 3/18/15. Analytical samples were taken on 3/16	/15 to demonstrate that Chlorides, TPI	H, BTEX, and Benzene are below the				
levels outlined in "NMOCD Guidelines for Remediation of Leaks, Sp	ills, and Releases." The area has been	backfilled with clean soil. The				
completion date is 3/23/15.	~					
I hereby certify that the information given above is true and complete to	the best of my knowledge and understand	that pursuant to NMOCD rules and				
regulations all operators are required to report and/or file certain release	regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger					
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability						
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health						
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other						
federal, state, or local laws and/or regulations.
