Subject: RE: Llano Disposal, LLC Brine Well Project (BW035).

Dear Mr. Burrows,

On behalf of the New Mexico State Historic Preservation Officer (SHPO) I want to thank for your providing the Historic Preservation Division more information on your project.

Our concern was, primarily with the construction of the pipeline. We have full confidence that you will do what is necessary to prevent inadvertent damage to archaeological sites during construction of the pipeline.

We appreciate the importance of the oil and gas industries' contribution to the economies of New Mexico and the United States, and we wish you the best in your enterprise.

Sincerely,
Bob Estes Ph.D.
HPD Staff Archaeologist

Subject: Llano Disposal, LLC Brine Well Project (BW035).

Dear Mr. Estes :

Llano Disposal, LLC was recently issued Brine Well Permit BW035. As you know, this project is located approximately 8 miles due south of Lovington, NM on the UBar ranch. The well we are using was originally drilled by Yates Petroleum, but was plugged and abandoned as noncommercial. Because this well was fairly deep, the well pad was large enough to accommodate a large rig. At the time the well was drilled, a arch survey was conducted, and apparently nothing of interest was discovered. We used an ordinary service rig to accomplish the re-entry, so only used a very small portion of the original well pad.

The tank battery/sales facility will be located southwest of the well site, near the Lovington/Arkansas Junction highway. We will be using a pipeline to carry product from the well to the sales facility. The fee land that this project is located on has been used for agriculture purposes for many, many decades.

As you noted in your response to public notice concerning this project, there are no known historic cultural sites. However, we do realize that we could easily uncover something important during our activities. Please be assured that we will be most vigilant in looking for anything of archeological importance or interest as we proceed. Also, please be assured that we will make certain that anything so discovered is immediately called to the attention of your office. I've lived in Lea County for all of my 67 years, and learned long, long ago that items from the distant past are uncovered under the most unlikely of locations, and when least expected.

Sincerely,
Marvin L. Burrows
Agent for Llano Disposal, LLC
Lovington, NM
