Hi R

I got voicemail on both phones. Do you have his email?

R

Randy,

I report to the general manager of VPR. His name is Gus Holm. I report all spills to him also.  
Phone Number 575-445-2059 ext 201  
Cell Phone Number is 575-447-1145

Hi Randy

The chemical test results look good to me. I would like to talk to the VPR environmental representative since they are the surface owner. Who do you normally talk to? Have you the phone number?

I don't see an issue with closure. I just want to introduce myself to the VPR rep and make this a matter of practice.

Thanks, Randy

Mr. Bayliss,

Here is the C-141 for the produced water spill I reported last week to you. I have also attached a water analysis and a photo. I am requesting that this spill be closed per the following information:

Produced water quality data from the well associated with or representative of the spill is attached. ARP Production Co., LLC (ARP) has found that in the Raton Basin CBM field, soil confirmation sampling no longer adds useful data on low volume acute releases of CBM produced water, as land uses and the environment are not impacted. Long term or negative effects to soil chemistry from low volume acute CBM produced water spills are generally surficial and benign, in that the water does not contain crude oil or liquid hydrocarbons; the TDS is significantly less than 10,000 mg/L; it is suitable for livestock watering, wildlife and in many cases surface discharge. Mixed with other water it is suitable for irrigation without impact.

When requested by the agency or Vermejo Park Ranch ARP has and will collect soil samples.

ARP requests closure of this incident based on this statement and attached water quality data.

Thank you

Randy
