RE: PNM Huerfano to DOE Loop Natural Gas Pipeline
Notice of Intent to Hydrostatically Test and Discharge

Dear Ms. Kieling:

The Public Service Company of New Mexico (PNM) proposes to construct 10 miles of 24-inch diameter new natural gas pipeline known as the Huerfano to DOE Loop Natural Gas Pipeline. The pipeline extends from PNM's Huerfano Take-off to PNM's DOE Take-off (see attached maps). This project will be located on private, Bureau of Land Management, and Navajo Allottee lands in San Juan County, New Mexico.

Construction of the Huerfano to DOE Loop Pipeline is scheduled to begin on March 17, 2003 and be completed by May 2, 2003. After the installation of the new pipeline, the 24-inch pipe and fabricated block valve installations will be hydrostatically tested. The test duration will be a minimum of 8 hours and will likely be conducted in mid- to late-April, 2003

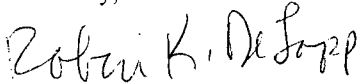

PNM proposes to use approximately 800,000 gallons of water from a potable water source. The construction contractor will be required to find the water source. PNM proposes to discharge the test water over a 24-hour period in an unlined existing pond located on lands administered by the Bureau of Land Management (BLM).

The attached maps show the location of the discharge pond in Township 24 North, Range 9 West, in the southeast quarter of Section 20. An aboveground pipe located along an access road will transmit the test water from the pipeline to the pond. PNM has applied for permission from the BLM to temporarily use the pond and access road for this purpose. Once the right-of-way agreements have been finalized, I can forward them to you.

According to State Engineer well records, the recorded depth to water near the point of discharge is 515 feet below ground surface.

Check number 114036 for \$500 was sent to your office on 1/31/03. This amount covers \$250.00 (\$100 for the filing fee and \$150 for temporary permission) for this project. Thank you in advance for your assistance. Please call me at (505) 241-2016 if you have any questions.

Sincerely,

Robin DeLapp
Senior Environmental Scientist
