Attn: Wayne Price

Dear Wayne:

Work is progressing in fits and starts at the Gandy Eidson Station due in large part to uncertainty over the Gandy Marley Landfarm permit status for salty waste. We've managed to excavate all of the contaminated soils from the bar ditch, test the bottom, spread a layer of compacted clay over the affected area and replace the excavated soils with fresh. Additionally, we've prepared the area for new brine water tanks by building berms and lining them with compacted clay. The actual tank installation should occur shortly.

Once the new tanks are on-line, we can begin to remove the chloride contaminated soils from the above ground impoundment and send it to commercial disposal.

Enclosed within this submittal are the test results for the bottom of the excavation along the bar ditch. Also included are photos of the tank prep area, and shots of the backfilled excavation – please note, we've already got vegetation over the entire length of the backfilled area.

We will strive to provide an additional update by the end of the first quarter, 2006.

Warmest personal regards,

Mike Griffin  
President  
Whole Earth Environmental, Inc.

CC: Larry Gandy / Gandy Corp.

RE: Discharge Plan DP-321

Dear Mr. Haseloff:

This is in reference to your quarterly reports for the 2nd and 3rd quarter of 1989. Earlier this year the New Mexico Water Quality Control Commission (WQCC) transferred regulatory authority for brine wells from the Environmental Improvement Division (EID) to the Oil Conservation Division.

By copy of this letter, I'm forwarding your quarterly reports to Dave Boyer of the Oil Conservation Division. Please send your future reports directly to:

Dave Boyer  
Oil Conservation Division  
State Land Office Building  
P.O. Box 2088  
Santa Fe, NM 87504

You may call Dave Boyer at 827-5012.

Sincerely,

Ernest C. Rebuck  
Program Manager  
Ground Water Division
