Subject: AP-119 GW Report

04/02/2020

Ben Arguijo – Trinity (on behalf of Pro-Kem)

Re: 2109 GW Report for AP-119

Dear Ben,

Following review of report indicated above, the following:

The Oil Conservation Division (OCD) APPORVES of the requested changes in sampling schedule as outlined in report and also APPROVES the requested changes in chemical parameters to be analyzed. Will assess gain in knowledge from this in future reports.

The OCD appreciates your efforts. Ben s I have no individual to contact in Pro-Kem relative to this report, I am asking you to forward this to said person. It would also be helpful if I could have that contact as well. Thank you.

Please keep a copy of this communication as no paper copy will follow. It will take some time for this information/report to be uploaded to imaging system.

Sincerely,

Bradford G. Billings

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
