**RE: Form C-141 – Major Release Notification
Blue Quail Interconnect
Eddy County, New Mexico**

Dear Sir/Madam,

Summit Midstream Partners, LLC (Summit Midstream), on behalf of Summit Midstream Permian, LLC, is submitting the Release Notification Form C-141 to the Oil Conservation Division of the New Mexico Energy Minerals and Natural Resources Department for the blowdown of two natural gas pipelines that occurred on June 30, 2019 at the Blue Quail Interconnect Valve Set (BLM Grant Number NM-137330) in Eddy County, New Mexico.

Summit Midstream is submitting Form C-141 as required by the release notification requirements of NMAC 19.15.29.9. Summit Midstream would like to note that the Site Assessment/Characterization and Remediation pages of Form C-141 are not applicable to a gas release, so those pages were not populated or signed.

Summit Midstream believes that no further action is required at this time and requests the closure of this incident. Should you have any questions or require additional information, please contact Jonathan Shares of Summit Midstream by phone at 720-358-3855 or by email at jshares@summitmidstream.com.

Sincerely,

Zak N. Covar
Vice President of HSE&R
