• Mr. Littrell,

The OCD has denied the submitted Closure Report C-141 for incident # **NCE2002756541** for the following reason:

- Horizontal delineation has not been completed. The edges -horizontal definition- of a liquid release must be determined. A visual footprint on the surface is not sufficient or adequate to assess the horizontal extent of the release.

The denied C-141 can be found in the online image file. Please review and make the required correction prior to resubmitting through the fee portal.

If you have any questions or believe this denial is in error, please contact me prior to submitting an additional C-141.

Thanks,

Cristina Eads

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
