Re: Closure request for 1R-5024 – Moore Sweet Historical Site

Following significant review and discussion, the following:

The request for Closure of 1R-5024 is APPROVED on the date of this communication. It may take a few days to upload into Oil Conservation Division (OCD) data base/imaging file. Please keep a copy of this communication for your records, as no paper copy will follow.

OCD appreciates your efforts and patience. Please make sure SLO is in agreement with your resurfacing endeavors as per Section 13 of Rule 29 (OCD) and their particular needs.

As a personal request, to ease in evaluation, please segregate data more openly in text portions of report, and feel free to have sectional maps of location for data visualization. Thank you.

Sincerely,

Bradford G. Billings

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
