**NRH2003737979 1003 PIPELINE @ I-26-24S-28E ON OE**

Mr. Fields,

The OCD has denied the submitted Closure C-141 for incident # nRH2003737979 for the following reason:

- The entire area has not been remediated to meet closure criteria where depth to groundwater is <50' below ground surface. Table 3a indicates an exceedance in sample S7 with respect to TPH, and it appears this sample was left in-situ.

The site characterization is approved, including the background sample data.

In the future, please do not amend the C-141 in a way that consists of removing text from the form.

The Denied C-141 can be found in the online image file. Please review and make the required correction prior to resubmitting through the fee portal. If you have any questions or believe this denial is in error, please contact me prior to submitting an additional C-141.

**OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.**
