**Subject:** [EXT] Extension Request- PLU Big Sinks 25 Federal Battery (2RP-5551)

All,

XTO is requesting an extension of the current deadline of October 5, 2019 for completing a remediation work plan or closure report required in 19.15.29.12.B.(1) NMAC at the PLU Big Sinks 25 Federal Battery (2RP-5551). The release was discovered July 7, 2019. Initial site assessment began on July 9, 2019. A Right of Entry (ROE) Permit was submitted, and the executed permit was received from the SLO on July 8, 2019. Field work was pending a review of whether a survey or continuous monitoring would be required. Based on stipulations from SLO and follow-up information, a survey was previously conducted in the vicinity and as such, XTO will not be required to have a monitor onsite. Remedial action is tentatively scheduled to begin October 14, 2019. To provide enough time for further site assessment, remediation work, and the completion of a remediation work plan or closure report, XTO requests an extension of the deadline to January 25, 2020.

Thank you,

Kalei Jennings
