**Subject:** Site Closures Mohawk and Wabash

11/5/2019

Marathon Oil – Isaac Castro

All,

Regarding Mohawk HT #001 (nGRL1313754595) no RP noted. This site is approved for closure, however, the depth to water evaluation needs more work, especially relative to recent Oil Conservation Division (OCD) clarifications. This note is for future work.

Regarding Wabash 20 Fed Com 1H, this RP-4880 is also closed. There was a question in report as to why the more stringent remedial/investigatory values were used. Answer: there was no known release date and no known release volume. Rule 29 speaks to this for your reference.

OCD appreciates your efforts and your patience. Please keep this electronic communication as NO paper copy will follow. All information will be uploaded soon to on line data base.

Sincerely,

Bradford Billings  
EMNRD/OCD  
Santa Fe

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations
