13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Pursuant to Condition 3.D.1 of the Bloomfield Terminal Injection Well Discharge Permit (UICI-011), Western Refining Southwest, Inc. intends to perform a Braden Head Test prior to conducting the Fall-Off Test. The test will be performed on the Braden Head and intermediate casing. The test will consist of blocking-in the Braden Head and Intermediate casing valves independently for at least 24-hour prior to conducting the test. The discharge of each casing valve will be a pressure gauge on the down-hole side of the valve to measure the casing pressure. With a representative of NMOCD on-site to witness the test, the Braden Head and Intermediate casing valves will be opened for a minimum of 15-minutes to witness any discharge of fluids. Once the test is completed, the Fall-Off Testing activities will begin (procedures are to be submitted as a separate Sundry Notice for Agency Review).

Upon receipt of NMOCD's approval of the testing protocol, Western will coordinate with NMOCD Aztec District Office to schedule the field activities that best work their availability.
