**Subject:** [EXT] Re: [EXTERNAL] RE: Marathon Oil Company - Final C-141 & Closure Report - ENDER WIGGINS 14 WA FEDERAL COM #001H (1RP-5739)

The Closure Report for 1RP-5739 has been approved by BLM as of 12/13/2019.

Site needs like approval from NMOCD.

The BLM acceptance/approval does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not re-vegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Good Afternoon all,

I'm so sorry about the late submittal on this but there was confusion as to who was to submit the C-141 between the contractor at fault and Marathon Oil. This has also been submitted online through the OCD online platform. Receipt is attached for your reference.

Thank you,

**Subject:** Marathon Oil Company - 24 hour notification - ENDER WIGGINS 14 WA FEDERAL COM #001H

Good Afternoon,

On August 23, 2019 completions reported a spill due to the actuator on the tub inlet valve failing. Fresh water continued into the tub causing the water to spray out. A total of 113 bbls of frac fluid was released (49 bbls was released onto the engineered pad and 64 bbls was released inside the secondary containment for the tub). Vacuum trucks were already on site and were able to recover 100 bbls total (inside secondary containment and from the engineered pad). Sorry about the late notification, we were just notified of this release. An initial C-141 will follow soon.

Thank you,

Isaac Castro
