OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

January 20, 1956

*Received
1/24/56
1/24/56*

Mr. John B. Wright
P.O. Box 140
Raton, New Mexico

Dear Mr. Wright:

Reference is made to your letter of January 18th and the copies of the Notice of Intention to Drill pertaining to the Melvin E. Condron No. 1 Moore, NW/4 NW/4 Section 10, Township 29 North, Range 24 East. We are returning the \$2,000.00 bond which you forwarded to us. This Commission requires each operator to file a \$5,000.00 one-well bond.

We are forwarding the Notice of Intention to Drill pertaining to the well to our inspector, Mr. Dan Nutter, who operates out of this office. We note that your proposed casing program contains only one string of 5½" casing, and it is highly possible that Mr. Nutter will not approve the form unless a surface string of casing is set. Please bear in mind that operations on this well cannot be commenced until a bond is approved by this Commission.

We are enclosing a copy of our rules and regulations and are forwarding another copy to Mr. Condron at his Cheyenne address.

Very truly yours,

W. B. Macey
Secretary - Director

OIL CONSERVATION COMMISSION

P.O. BOX 801

SANTA FE, NEW MEXICO

309Y

The Commission has received information from the Santa Fe Oil Field, New Mexico, that the field is producing oil at a rate of approximately 1,000 barrels per day. The field is located in the Santa Fe area, and the oil is produced from a well which is approximately 100 feet deep. The oil is produced from a sandstone formation, and the well is completed with a sandstone packer. The oil is produced from a well which is approximately 100 feet deep. The oil is produced from a sandstone formation, and the well is completed with a sandstone packer. The oil is produced from a well which is approximately 100 feet deep. The oil is produced from a sandstone formation, and the well is completed with a sandstone packer.
