Re: Plug & Abandonment
Moore Ranch-State #1
Sec. 16, T29N-R24E
Colfax Co., New Mexico

Dear Roy:

Enclosed please find enclosed the following:

- a) Form C-103: 3 copies
- b) Form C-105: 6 copies
- c) Welex Electric Logs
- d) Mud Log

Dry samples will be posted under separate cover.

Your advice and cooperation in the permitting and drilling of the Moore Ranch-State #1 is appreciated. Unfortunately this one was dry but we have not condemned the entire prospect. Several of the formations encountered have excellent reservoir potential. It is just a matter of finding the right spot. We plan on seismic evaluation and additional test wells in the not too distant future.

Also, drilling equipment is still on location, but as soon as it is removed the location will be reconditioned to Alice Moore's satisfaction. I will call you when it is ready for inspection.
