Re: Iceco, Inc. remedial work
on Libby CO₂ wells
Harding County.

Dear Mrs. Connor:

I have your letter of July 21 and accompanying Forms C-102 on the proposed work at the Iceco CO₂ gas wells in Harding County. Enclosed is your approved copy.

I realize that it was too early to predict the exact programs that would be needed for each well. Consequently I shall be anticipating a detailed account of all remedial work done on each well. Iceco has plant men at the Bueyeros that should be able to witness the work and relay to you all necessary details. It would assist you if this were done in writing rather than over the radio. Similarly an account of the work done by the service company or contractor submitted to you on their own service (charge) forms or stationary would assist you in your final reports for each well.

I have been advised indirectly by Messrs. Seth and Montgomery and Mr. Libby that work has started on the Iceco wells. I do not know however, the name of the service company, the exact date when such work commenced, or on what well they started.

Very truly yours,

EUGENE A. CHAVEZ
Oil & Gas Inspector - Dist. #4

Mr. Eugene A. Chavez
Oil and Gas Inspector, District 4
Oil Conservation Commission
Post Office Box 871
Santa Fe, New Mexico

Dear Mr. Chavez:

Complying with your wishes we are enclosing the report of work expected or proposed to be done at the ICECO, INCORPORATED plant in Harding County, New Mexico.

I talked over the telephone to Dr. Secord and this was agreeable with him.

Yours very truly,

ICECO, INCORPORATED

Office Manager
