Tucumcari, New Mexico

March 1, 1954

Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Attention: Mr. Eugene A. Chavez:

Dear Mr. Chavez:

We are enclosing a report for the year 1953 on Production and Disposition of Carbon Dioxide at our plant near Bueyeros, New Mexico.

We sincerely appreciate the very kindly assistance which you provided in you letter of February 2, 1954, and thank you for the same.

You will observe that the volume reported in MCF is 97,152.3 representing of course 97,152,300 cubic feet of gas.

The only report under Disposition of Revenue is the amount of gas lost by venting, which we estimate is the difference between production.

The report for January will follow this and for February will be in not later than the 15th of March.

Very truly yours,

Iceco, Incorporated

Libby Connor
Office Manager
