Attention: Mr. Eugene A. Chavez

Dear Mr. Chavez:

Your very nice letter of January 12, 1954 was received in Chicago. Your forms arrived five or six days later.

It is very unfortunate that closer attention was not paid to filing of reports to your office by those who were in charge of office affairs from February 1, 1953 to October 1, 1953 when our Mrs. Connor took charge. Furthermore, the writer should like you to know that these report forms were never brought to his attention. Since these forms have never been handled by those now in charge, we should appreciate information which should make it possible for us to serve your office with the greatest expediency.

Our plant produces Carbon Dioxide gas only. In section number one of sheet one, under total gas from gas wells, do we assume correctly M. C. F. under volume refers to the number of cubic feet expressed in thousands?

Under disposition of residue, do we assume correctly in our case that you have reference to the solidified carbon dioxide? In the same section under vented would you expect us to express number thousands cubic feet loss?

Under plant production we assume that under production, we would give the amount of Carbon Dioxide gas expressed in terms actually recovered from our operation?

Under deliveries, do we assume correctly that we report our production per month, less any loss by evaporation?

Thanking you for an early reply and assuring you of our desire to cooperate with your office in every possible way, we remain

Very truly yours
