Dear Mr. Ramey:

This well (Libby Well No. 3-H, Section 15, Township 20 North, Range 31 East) was drilled in 1980 and perforated. Periodically, the plant personnel blow this well and pressure is present. In a short period of time flow falls off to zero while venting to atmosphere.

The reason further work has not been done on this well is that at the present we have sufficient gas to meet demands of the plant. We do, however, anticipate perforating this well in the Glorietta zone sometime in the near future and I believe this to be sufficient reason not to plug the well. I do not know when this will be done but plans are going to be discussed sometime in August as tentatively planned.

Thank you for your cooperation and concern. I will gladly keep you informed.

Very truly yours,

Richard M. Kuckelman
Production Manager

Attention: Mr. R. M. Kuckelman

Gentlemen:

I am in receipt of Division Form C-103 for your Libby Well No. 3-H, Section 15, Township 20 North, Range 31 East, wherein you request temporary abandonment status for an additional 12 months.

Before this can be granted, will you please explain why this well cannot be produced. If the well cannot be produced it should probably be plugged unless it can be utilized for some other legitimate purpose.

Your very truly,

JOE D. RAMEY
Director
