Iceco, Inc. Libby #1, SW $\frac{1}{4}$ NE $\frac{1}{4}$
Sec. 31, Twp. 20N, Rge. 31E.

Dear Mr. Holden:

This is in answer to your letter of July 27th, 1951, pertaining to delinquent reports on the above caption wells. In reviewing the files on the above wells I find the following:

The Iceco #1 -
C-101, Notice of Intention to Drill was filed January 19, 1950, approved by me February 9, 1950. There is some question as to whether this well was drilled or not. If it was drilled we are in need of C-102, Miscellaneous Notices, C-103, Miscellaneous Report on Wells and C-105 which is a log of wells along with other pertinent data.

Iceco De Baca #2 -

For this well we have the surveyor's plat showing the exact location, C-102 and C-103, which gives an adequate account of the re-work which was accomplished on this well by Halliburton. We are lacking however, form C-105, which is a log of this well along with other information which is noted on the form. It may be the log for this well is not available since it is an old well, but if it is possible to obtain this information we are interested in having it.

Iceco Libby #1 -

We have only a C-101, Notice of Intention to Drill, dated April 19, 1950,

OIL CONSERVATION COMMISSION

Iccco, Inc. - Page #2 - July 25, 1951. SANTA FE, NEW MEXICO

approved by me April 22, 1950. I am under the impression that this well has been drilled and completed and is now delivering gas to your plant. If this is true we need the following forms: C-102 and C-103, covering the exact nature of the casing program as well as any other information on work that was done. These forms should give an account of whip stocking, shooting, plugging back, etc. We also need a C-105, which I am sure should be available for this well.

In my letter of June 1, 1951, to Mr. Don Schreiber, I briefly explained the use of forms C-110, Certificate of Compliance and Authorization to Transport Oil or Gas and form C-114, Gasoline and other Extraction Plant Monthly Reports, and which I have referred to in a recent letter to you. You will note that C-114 is not precisely for Carbon Dioxide production, however this is the form we intend to use until such time as we have a form for this specific reporting. The things that we are interested in pertaining to your operations are the amount of gas produced from each well, the liquids or solids extracted from this volume and where these liquids and solids are marketed.

It will probably be three or four weeks before I am in the vicinity of Tucumcari, but on my next trip to this area I will notify you so that we can get together for a discussion of these matters, however if you possibly can, I would like to have the above information before that time.

Very truly yours,

Elvis A. Utz
Gas Engineer

COMMISSION ON THE STATUS OF WOMEN

REPORT OF THE COMMISSION

1975

The Commission on the Status of Women was established in 1946 by the United Nations. Its mandate was to promote the status of women and to ensure their full participation in the development of the world. The Commission has since then held several sessions, each with a specific theme. The first session was held in 1946 in London, and the second in 1949 in Copenhagen. The third session was held in 1953 in Geneva, and the fourth in 1957 in New York. The fifth session was held in 1961 in Mexico City, and the sixth in 1965 in Belgrade. The seventh session was held in 1971 in Mexico City, and the eighth in 1975 in Mexico City. The Commission has since then held several more sessions, each with a specific theme. The ninth session was held in 1979 in Mexico City, and the tenth in 1983 in Mexico City. The Commission has since then held several more sessions, each with a specific theme. The eleventh session was held in 1987 in Mexico City, and the twelfth in 1991 in Mexico City. The Commission has since then held several more sessions, each with a specific theme. The thirteenth session was held in 1995 in Mexico City, and the fourteenth in 1999 in Mexico City. The Commission has since then held several more sessions, each with a specific theme. The fifteenth session was held in 2003 in Mexico City, and the sixteenth in 2007 in Mexico City. The Commission has since then held several more sessions, each with a specific theme. The seventeenth session was held in 2011 in Mexico City, and the eighteenth in 2015 in Mexico City. The Commission has since then held several more sessions, each with a specific theme. The nineteenth session was held in 2019 in Mexico City, and the twentieth in 2023 in Mexico City.
