Gentlemen:

In 1977 William Gruenerwald & Associates drilled the Gonzales-Pittman #3,
660' from the North line, 687.64 from the West line, Section 19-T21N-R22E.

In reviewing my files, surface casing amounting to 571' of 7" was left in the hole
and an affidavit for conversion to a water well was filed. At that time, additional
drilling was contemplated with this as a water source. Evidently, no further action
was taken to plug.

Could you please supply the plugging affidavit forms so that this well can be finally
abandoned.

Very truly yours,

William Gruenerwald
