Memo

From
CARL ULVOG
Chief Geologist

To
File

Yates # 2 - T4 Cattle Co.
N-32-11N-27E

Waterflow problem @ 2200'
2500 ppm Cl
All contained on loc.

Western Co. (Roswell) to cement
(grout) formation.

(by corel w/ #1 well) I determine
this to be the Glorieta.

Requested copy of Western's
sementing report be attached to
Yates C-103. Also called Yates
and requested report on water -
quantity, quality, how contained, etc.
