I. A. Stephens - Lee #1 - Sec. 32-6N-30E - Quay County.

This location was given final inspection after plugging. The surface indicated that the well-bore was properly plugged according to our recommendations. However, considerable amount of junk, casing and the pits were not covered.

I called on Mr. H. J. Lee. I inquired as to whether it was agreeable to leave the pits as they were so that we might release the Bond. He stated that he was and would give us a letter or release in this regard.

This letter was received from him October 22. We are in a position to release the bond pending receipt of samples.

ELVIS A. UTZ,
Gas Engineer
