(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

January 7, 1943

Well No. 1 is located 660 ft. from N line and 660 ft. from E line of sec. 28
NE 1/4 Sec. 28 S-N 30-E N.M.P.M.
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Frio Dam Gray New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4499.1 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

At 7:00 P.M. January 9, 1943, 72 hours will have elapsed since setting 13" casing at 1084' and cementing to the surface with 300 sacks of cement.

At this time, we plan to test this casing shut-off in the following manner:

Build up 1000# pressure and hold for 30 minutes. If the test is o.k. drill plug, again build up 1000# pressure and hold for 30 minutes. If this too is o.k. drilling will be resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
