**NEVILLE G. PENROSE, Inc.**

**Re: Tippens No. 1  
NWNW Sec. 35-12N-34E  
Quay County**

I visited the above captioned well which was formerly the Tippens-Hamill No. 1. It has been taken over by N. G. Penrose, Inc., and is to be deepened from 5615' to approximately 7000'.

The operator has rigged up a Wilson jack-knife rotary, all cement plugs have been drilled out, and the hole has been cleaned out to original total depth. Bottom was reached today and the actual deepening commenced. Total depth at the time of my inspection was 5618'.

This well is located approximately one mile north of Porter village, which is best reached by state road 39, southeast of the Canadian River bridge near Logan.

NEVILLE G. BENDON, Inc.  
Re: Tipbens No. 1  
NWN Sec. 38-15N-34E  
Cady County

I visited the above captioned well which was formerly the  
Tipbens-Hamill No. 1. It has been taken over by N. G. Bendon,  
Inc., and is to be deepened from 551' to approximately 7000'.

The operator has rigged up a Wilson jack-knife rotary, all  
cement plugs have been drilled out, and the hole has been cleaned  
out to original total depth. Bottom was reached today and the  
actual deepening commenced. Total depth at the time of my  
inspection was 551'.

This well is located approximately one mile north of Porter  
village, which is best reached by state road 39, southeast of  
the Canadian River bridge near Logan.
