INSPECTION REPORT

June 12, 1952

BESS OIL & GAS COMPANY

Re: Bess-Rock Bros. #1
NESW Sec. 10-16N-35E
Quay County

Total depth at the above captioned well today is 2810' and drilling is continuing satisfactorily. The formation here is a highly quartzitic coarse to medium grained sandstone which showed no petroliferous fluorescence when viewed under a flouroscope. A very weak oil cut was noted after the sample was washed with carbon-tetrachloride.

A handwritten signature in cursive script, reading "Eugene A. Chavez".

EUGENE A. CHAVEZ,
Geologist - District 4
